

# CARBON-LITE™

COMMERCIAL VACUUM

Mosquito's new Carbon-Lite™ is simply the lightest, most powerful commercial backpack vacuum available today. New exotic Poly Carbon™ material combined with the industry's most powerful Pulse Power™ motor gives you unmatched performance. At Mosquito our attention to detail and commitment to innovation never ends. Our latest product, the Carbon-Lite™, is the beginning of a true revolution in industrial backpack vacuum design and performance.

Mosquito's state of the art design studio overlooks our production stations in Huntington Beach, California USA. Furthering our commitment to quality our new Carbon-Lite™ boasts an impressive 88% of components manufactured in the US. Combine that with the industry's longest warranty and the choice is clear.

## THE CARBON-LITE

- The body: New use of Poly-Carbon™ material. Lighter and stronger. The Carbon-Lite™ is approximately 22% lighter than the ProTeam Pro 10.
- The motor: Our new Pulse Power™ motor has 121" of lift, approximately 42% more than ProTeam!
- The hose: Our exclusive Never-Clog tapered hose is an industry first and patent pending. The hose starts at 1.5" and grows to 3" as it enters the vacuum. An 8" straw doesn't get stuck. Try that with the competition.
- Components: Titanium/aluminum components, strong and lightweight.
- Cooler: The backrest is suspended away from the vacuum, keeping your back cooler.
- Blower: The Carbon-Lite™ doubles as a blower on the 10qt. This innovative feature is further enhanced with the use of the crevice tool on the end of the hose.
- Tools: The Z-Glide tool upgrade is standard on the Carbon-Lite™.
- Extension Cord: Our exclusive Premium Ultra-Glide cord slides easily across floors and resists cord twisting. Available only from Mosquito!
- [YouTube](#) training tutorials for each feature, benefit and comparison.
